

AUV-IITB comprises of highly enthusiastic and hard working technocrats ranging from bright-eyed freshmen to driven senior undergraduates and tech-experienced post-graduates spanning various branches of engineering like Mechanical, Electrical, Software, Aerospace, Material Science, Civil, etc.

We are a relatively young team to RoboSub family. We do not know our place yet, we do not know our limits yet but to us this means that we do not have a limit. We are ready for the competition to give it a try - young and fresh.
