

The Montana State University Robosub team is made up of about 9 members overseen by our team advisor Dr. Jim Becker and supported by our sponsors at NAVSEA. This year we had a 5-person senior design class in charge of our mechanical and electrical design and construction. In addition, we have 3 club members that have assisted in machining, testing, as well as overseeing all of the software development. Overall, we have three ME, one MET, 3 EE, and one CS major.
